

Reduced Carbon Chapel Allerton (RCCA)

Chapel Allerton Parish Council is committed to reducing carbon.

The Parish Council will:

- a) encourage increased energy efficiency in homes and businesses, and support planning applications which are low carbon and/or include renewable energy use.
- b) encourage small scale renewable energy production when it is appropriate
- c) support local sport and recreation facilities within the Parish which reduce the need to drive
- d) support schemes to improve tracks for walkers, bicyclists and horse riders and to make it safer for these groups to use the public highways
- e) encourage tree planting and maintenance plans
- f) discourage removal of native hedgerows
- g) promote installation of public charging points for electric cars
